

## **SERVICE OUTSIDE ORIGINAL SERVICE AREA**

Individuals outside the original Water District, but within the Stagecoach General Improvement District (SGID) Service Area may petition the District to provide water service.

In addition to paying all related costs (including hook up fees) and the cost of any necessary main line extension and upgrades to the water system, they shall supply additional water rights to the District sufficient for the number of anticipated additional water hookups.

Those water rights may be supplied as follows:

- A. Upon the approval by the State Engineer those EXISTING lots or parcels within the SGID Service Area may meet the water right required by the relinquishment of their domestic well right and the abandonment of any wells on the property.
- B. Any person wishing to split, parcel or subdivide any property within the SGID Service Area hereto, may only receive water service from District upon tendering and transferring to District, without cost, sufficient water rights to serve all the additional proposed lots.
